

Ophelia,  
Please listen to me now,

erin st breen

I'm searching for the epigenetic  
connection between the mice, this tall house,  
paternity, and illness like kronos,  
apollo, & hamlet - *through the steep and  
thorny way*. You are so much better than  
my big old yellow book, gracious goddess  
briefly visiting our cool rose garden -  
where these genetic threads were  
spider webs weaving us three together.
